ORDER MANAGEMENT HX

Optimize and automate order processing with a highly accurate AI solution, consolidating information from multiple systems into a unified, user-friendly UI

Opportunity

- Maximize data integrity across multiple systems
- Eliminate time-consuming swivel seating and process validations
- Expedite exception management process
- Ensure timely allocation of order priority to meet SLAs

Wow Factor

Customer Order Input → Processing Engine → Unified UI → Exception Handling → Reporting & Insights

Continuous Improvement

Data consolidation	Classification & prioritization	Automated processing	Exception handling	Reporting & insights
①	②	③	④	⑤

Supporting Evidence

- 75% orders auto processed without human intervention
- 99%+ accuracy
- 75%+ improved productivity during exception handling

So What

- Highly scalable, user-friendly solution with configurable workflow
- Significant improvement in processing time and accuracy, while reducing the cost to serve

Success Stories

Reduced manual order processing time by 80%

Consolidated validation checkpoints by 40%

Improved order processing accuracy from 95% to 99%+
